

Grays Harbor County COVID-19 Student Symptom Flow Chart

Updated: 9/16/21

Symptoms	Quarantine Duration	Vaccination	Close Contacts
<p>CLASS A:</p> <ul style="list-style-type: none"> Fever (defined as subjective or 100.4 or higher) Chills Cough Loss or taste/smell Shortness of breath <p>CLASS B:</p> <ul style="list-style-type: none"> Fatigue Headache Muscle/body aches Sore throat Congestion or runny nose Nausea or vomiting Diarrhea <p><small>*That are not explained by an existing condition such as allergies or asthma.</small></p>	<p>There are two acceptable options for quarantine:</p> <ol style="list-style-type: none"> The standard 14 Day quarantine If a person in quarantine receives a negative confirmatory/PCR test and has no symptoms, quarantine can end after Day 7. The person must be tested on or after Day 5. Even if a negative test is received before Day 8, the quarantine period should still be a full seven days. <p><small>* If a close contact has no symptoms and provides proof of COVID-19 infection in the last 45 days, quarantine can be avoided.</small></p>	<p>Vaccinated persons who are close contacts of someone with COVID-19 are not required to quarantine if they:</p> <ul style="list-style-type: none"> Are fully vaccinated, meaning at least two weeks have passed since their second dose (or single Johnson & Johnson dose) Have not had symptoms since current COVID-19 exposure <p><small>*Vaccinated inpatients and residents in healthcare settings are an exception</small></p>	<p>"Close Contact" means being within 6 feet of a person with COVID-19 for about 15 minutes or more. Members of a household are considered to be close contacts. For schools, a "Modified Close Contact" means being within 3 feet of a person with COVID-19 for about 15 minutes or more, fully masked. This modifier applies to students only.</p>
